

Polling Methodological Note – August 2020

A representative sample of 1,161 adults in Great Britain were interviewed between the 6th and 10th August 2020. All interviews were conducted as online self-completion. The Kantar online access panel was the main sample source.

The data was weighted to match population totals for age, gender, 2019 General Election voting patterns, 2016 EU referendum voting patterns, education, region, and likelihood to vote in the next General Election. Further details on the weighting are given on page three.

Voting intentions

The voting intention figures provided aim to show the current political opinion of the nation rather than to accurately predict the outcome of the next General Election.

As well as weighting the data, a Likelihood to Vote (LTV) Model has been used to estimate the voting probability of each respondent. These probabilities vary by stated likelihood of voting, age and whether reported voting in the 2017 general election. The probabilities themselves are based on those of respondents that participated in our polls immediately before and after the 2017 General Election.

Uncertainty

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that it lies within 2 points.

Sampling variance

We have estimated the sampling variation in our voting intention estimates using the methodology proposed by Kuha and Sturgis (2017¹). Bootstrap resampling was used to draw fifty sets of respondents from the achieved sample (in a way which matched the quota sampling design), each of these new samples was weighted and we have then used the distribution of estimates (from the resamples) to calculate margins of error (the range containing all but the two most extreme resample results).

- Conservative Party = 38.6% to 45.0%
- Labour Party = 33.2% to 38.4%
- Conservative lead over Labour = 2.0%pts to 11.2%pts

¹ See: https://www.europeansurveyresearch.org/news/non-prob/INPS_06_Kuha.pdf and <https://rss.onlinelibrary.wiley.com/doi/full/10.1111/rssa.12329>

Weighting

Weights have been applied to the sample to ensure that it is representative of the general public in Great Britain aged 18+. The sources for the population totals are provided in each table.

Gender* and age

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
Male 18-24	60	65
Male 25-34	103	100
Male 35-44	92	92
Male 45-54	103	100
Male 55-69	141	123
Male 70+	62	87
Female 18-24	72	61
Female 25-34	103	99
Female 35-44	99	93
Female 45-54	108	103
Female 55-69	156	129
Female 70+	62	108

*Those reporting an "other" gender are randomly allocated to male or female.

Region

Source: ONS Mid Year-2018 Population Estimates:

	Unweighted count	Weighted count
North East England	68	49
North West England	126	131
Yorkshire & Humber	121	98
East Midlands	89	87
West Midlands	118	105
East of England	112	111
London	113	157
South East England	152	164
South West England	119	103
Wales	49	57
Scotland	94	100

Education by age

Source: Annual Population Survey (Jul 2018-Jun 2019)

	Unweighted count	Weighted count
Aged 18-24 with a degree	37	23
Aged 25-44 with a degree	180	162
Aged 45-69 with a degree	162	123
Other	782	853

Vote in the 2016 EU referendum*

Source: EU referendum & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
Remain	43%	31%
Leave	39%	33%
Did not vote	19%	36%

*An imputed response is given for those that prefer not to say who they voted for in the referendum.

Vote in the 2019 General Election*

Source: General Election & ONS Mid Year-2018 Population Estimates

	Unweighted percentage	Weighted percentage
England - Labour	28%	18%
England - Conservative	30%	25%
England - Lib Dem	8%	7%
England - Other	6%	3%
England - No vote	16%	34%
Scotland - Labour	1%	1%
Scotland - Conservative	2%	1%
Scotland - SNP	3%	2%
Scotland - Other	1%	1%
Scotland - No vote	1%	3%
Wales - Labour	1%	1%
Wales - Conservative	1%	1%
Wales - PC	<0.5%	<0.5%
Wales - Other	1%	<0.5%
Wales - No vote	1%	2%

*An imputed response is given for those that prefer not to say who they voted for in the 2019 General Election.

Likelihood to Vote in General Election

We have estimated the likelihood that each respondent will vote in the next General Election. This value is based on respondents' stated intention to vote, their age and whether they voted in the last general election. The expected population turnout has been included as a population total in the weighting matrix. This turnout has been estimated based on the relationship between sample and population turnout rates in the 2017 general election.

	Unweighted percentage	Weighted percentage
Estimated Voting Age Population turnout if General Election were to be held tomorrow	83%	60%

The model was developed using data from respondents that participated in Kantar polls immediately prior to the 2017 general election and immediately after the election.

Further details

Please contact Luke Taylor luke.taylor@kantar.com for further details on the methodology used in this polling.
